PROFESSIONAL SUMMARY

Versatile Full-Stack and Mobile Developer with over 3 years of experience engineering end-to-end digital products, scalable backends, and highly interactive user interfaces. Proven track record of shipping 15+ projects, combining strategic product thinking with technical expertise across web, mobile, and AI spaces. Experienced in managing full product lifecycles and deploying reliable software solutions tailored for regional and international markets.

CORE SKILLS

Frontend & Mobile: React, JavaScript, HTML5, CSS3, Flutter (Cross-platform iOS & Android)

Backend & Database: Node.js, Express, PostgreSQL, MongoDB, Socket.IO (Real-time architecture)

AI & Tools: Google Gemini AI Integration, Git, Docker, REST & GraphQL APIs, Paystack Gateway

TECHNICAL PROJECTS

NSMQ Prep Hub 2026

Lead Full-Stack Developer

- Engineered an AI-powered quiz preparation mobile application designed for Ghanaian Senior High School (SHS) students training for the National Science & Maths Quiz.
- Integrated Google Gemini AI to deliver automated explanations and intelligent learning capabilities for complex academic problem sets.
- Implemented real-time multiplayer tournament infrastructures and live-updating leaderboards utilizing Socket.IO and a PostgreSQL database backend.

Music Hub (Kukunakam Studios) 2026

Full-Stack Developer

- Architected a complete music marketplace platform connecting independent music artists and commercial producers.
- Developed core business features including custom digital beat licensing workflows, active studio booking management, and tiered user subscriptions.
- Integrated Paystack API to handle secure, localized multi-channel payment processing.

PROFESSIONAL EXPERIENCE

El Baronn Tech 2023 – Present

Freelance Full-Stack Developer

- Manage the entire product development lifecycle for diverse clients, covering software architecture, production deployment, and system performance scaling.
- Build clean, cross-platform mobile apps and responsive web apps utilizing modern web technologies and secure relational database backends.
- Deploy automated practices and containerized environments to streamline developer workflows and product delivery pipelines.

EDUCATION

Senior High School Program Completed

Concentration in General Science
